Cellular Concrete Equipment

CFP6-1C

Richway's CFP6-1C is designed as a portable system for use in production of cellular concrete. This pre-mix system has a 6 gallon (22L) tank capable of producing 20 cubic feet (566 L per min) of foam per fill. With a foam production output of up to 1CFM (28 L per min), it's an ideal machine for small cellular concrete projects such as architectural or decorative work.

FULLY PORTABLE

- Configuration: Portable Unit
- Foam Output: 1 CFM (28 l/min)
- Air Compressor: 115V Diaphragm
- Water/Concentrate Tank: 6 gal (22 l)

EASY OPERATION

PRODUCTION READY

- Length: 24 in (61 cm)
- Width: 17 in (43 cm)
- Height: 40 in (102 cm)
- Weight (Dry): 65 lbs (30 kg)
